Q: Remove Item from List in Array Hi I have a List public List someList; I am reading some data into this list from a text file. I want to remove a value from this list and insert it into a new string array. I am using a foreach loop: foreach (string i in someList) { if (i == "value1") someList.removeAt(0); } However when I do this I get an error telling me that the List does not contain a remove method. So how can I remove an item from a list that only contains a foreach loop? A: List doesn't have a RemoveAt method. However, you can accomplish this using the Remove operation as follows someList.Remove(someList.FirstOrDefault(p => p == "value1")); or you could use the List.RemoveAll method someList.RemoveAll(e => e == "value1"); A: The.NET framework assumes that an object property of type List has a public and non-explicitly defined IEnumerable GetEnumerator() member that returns an IEnumerator type object. This corresponds to the.NET framework concept of a sequence type. A sequence is typically defined to be
